About the course

The Aesthetic and Functional Crown Lengthening Course by Adjutant is taught by Dr Azim Malik, an internationally recognised specialist periodontist with extensive experience in crown lengthening and soft-tissue surgery.

This in-depth programme is one of the most comprehensive Aesthetic and Functional Crown Lengthening courses in the UK, designed to bridge theory and clinical application. The course equips delegates with the knowledge, confidence and practical understanding required to assess, plan and perform crown lengthening procedures in everyday clinical practice.

Dr Malik lectures internationally on this subject and brings a wealth of real-world clinical insight to the teaching. Delegates will receive detailed workbooks, structured learning resources and ongoing after-course support to ensure long-term success.

By the end of the course, participants are expected to confidently incorporate crown lengthening into their treatment planning, manage suitable cases independently, and implement these techniques effectively within their daily practice.

Course Objectives

- Principles of biologic width and altered passive eruption classification
- Case selection, diagnosis and pre-surgical assessment
- Surgical armamentarium and crown lengthening protocols
- Application of crown lengthening in bonding and orthodontic cases
- Surgical guide, 3D stent and smile design principles
- Management of surgical complications
- Advanced aesthetic and functional crown lengthening techniques
- Hands-on practical training, including suturing techniques

Hands on practical

The hands on practical will be on pigs jaws and will go through the step by step aspects of surgical crown lengthening.

Suturing techniques in crown lengthening surgery will also be demonstrated

Course outline

Morning Session

08:45-09:00: Registration

09:00-10:30: Fundamentals of crown lengthening surgery

10:30-10:45 Tea and Coffee break

10:45-11:45: Theoretical concepts and surgical principles

11:45-13:00: Advanced techniques, smile design, case studies

13:00-14:00: Lunch

Afternoon session

14:00- 14:30: Further Case based discussions

14:30-17:00: Hands on practical on pigs jaws

What to bring

We recommend that you bring your loupes and light to the course. Although this is not mandatory it is highly recommended.
